

ROUNDBRAND LTD

Looking for a door that makes the grade?

A door which has been designed to be both beautiful and practical?

You've found it

Roundbrand composite doors are manufactured using sheet-moulded, thermosetting resin, glass reinforced polymer (GRP). They are compression moulded to give a high-definition panel design, offering an authentic timber-grained appearance.

They are scratch and dent resistant and their high-strength construction offers enhanced security.

The insulating core is produced from 100% CFC-free, polyurethane foam which fills the cavity between

the two door skins. This provides superior thermal performance (six times that of timber) and also enhances the door's soundproofing.

The stiles and rails are constructed from a PVC composite material which offers complete waterproofing of the insulated core.

The outer frame is constructed from steel-reinforced uPVC.

Exceptional Durability

High-impact resistant glass reinforced polyester (GRP) skin will maintain its pristine appearance in the face of everyday knocks.

Low Maintenance

Our GRP composite doors are designed to be easy to maintain, including the decorative glazing units.

Excellent Weatherproofing

Water resistant polymer composite rails that protect its core. This means your door will keep the weather at bay and stay looking good for longer.

Our GRP composite door is manufactured to the highest of standards to ensure it is strong, durable and secure.

Our door has a perimeter sub-frame of a solid, water-resistant polymer material, which is reinforced with Laminated Veneered Lumber (LVL). High impact resistant GRP skins are bonded to the sub-frame, and the core of the door is filled with high-density, 100% CFC-free polyurethane foam.

Water resistant polymer composite rails protect the core from damage or water absorption and the high-impact resistant thermoset GRP skin keeps your door looking great for longer.

Stunning Aesthetics

Symmetry and balance are very much key elements as we want you to look at your door and feel it is perfect in every way. The woodgrain finish was developed from oak tree grain, creating a beautifully authentic appearance.

Superb Sound Insulation

Weighted noise reduction of 31 decibels, your new door will keep outside noise to a minimum, helping to make your home the haven you want it to be.

Unparalleled Security

Thanks to its rigid polymer subframe, high-density CFC-free polyurethane foam core, high-impact resistant GRP skin and high-quality multi-point locks.

Side Panels

Adding a side panel to your door gives a stylish extra dimension to truly make a statement.

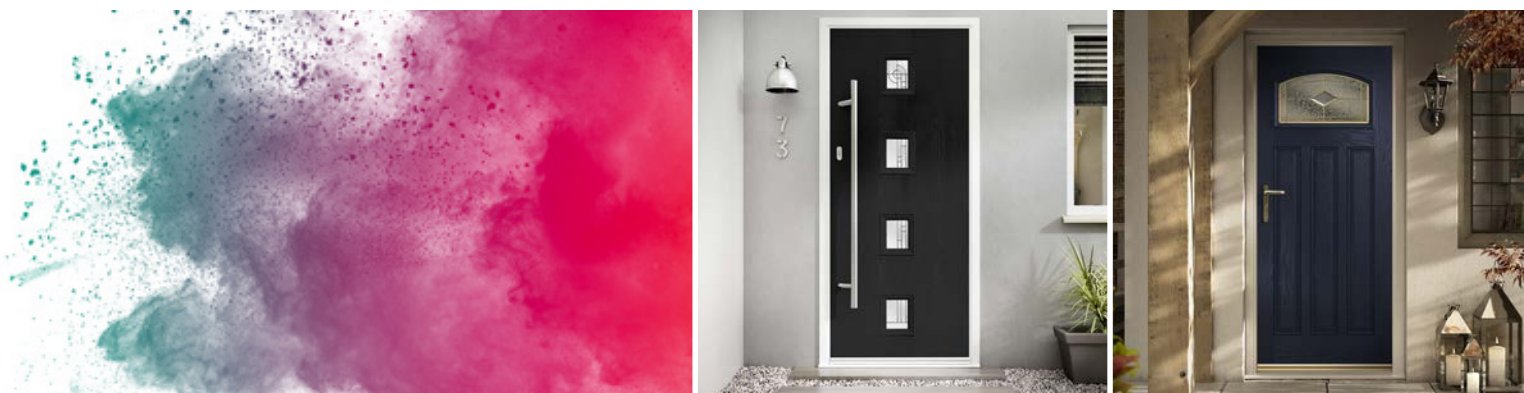

SP01 SP02 SP03 SP04 SP05 SP06

The most energy-efficient door on the market... *fact*

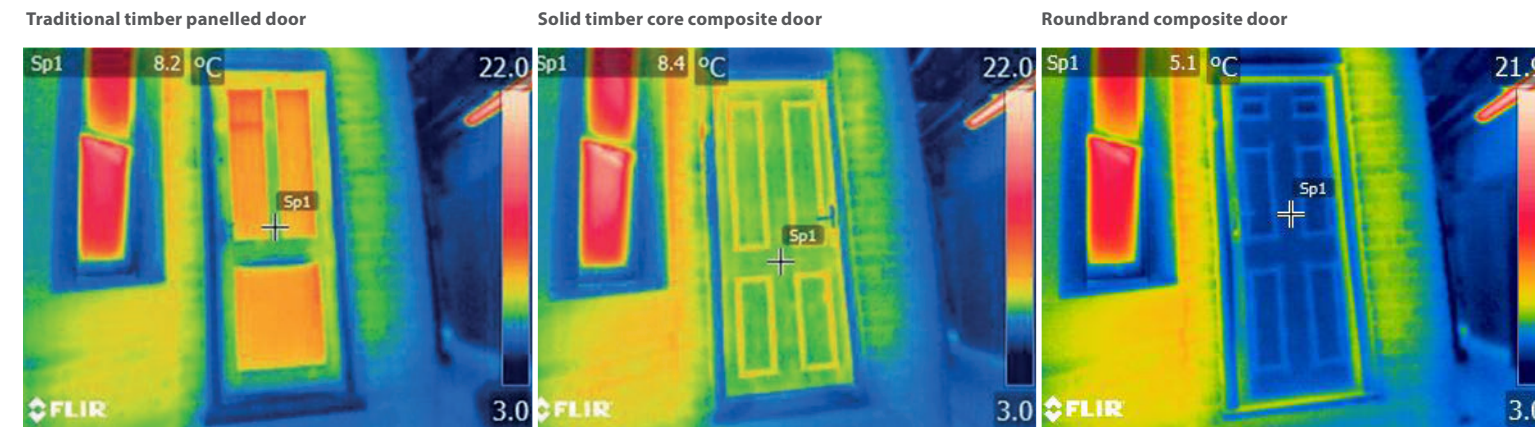

The rising cost of energy bills and the impact on the environment means we all want to keep our consumption to a minimum. One of the best ways to achieve this is to choose thermally-efficient products which will keep warmth in and cold out, saving money and reducing emission levels.

The photographs below show the thermal efficiency of each of the doors we tested. The darker the blue, the less heat is being lost. Reds and greens – the predominant colours on the timber door – indicates high heat loss.

Care and Maintenance

Your GRP composite door has been designed to be easy to maintain.

To keep your door clean, prolong the life of the surface finish and protect your warranty, we recommend you wash it regularly using warm soapy water (washing up liquid is ideal) and a soft, lint-free cloth. If you live in a coastal area, in a heavily industrialised area or near a main road, you may need to clean your door more frequently.

It is important that you DO NOT use any of the following on your door:

- Abrasive cleaners or scouring pads
- Any type of bleach or solvent (e.g. white spirit, methylated spirit, cellulose thinners, acetone or nail varnish remover)
- Any type of adhesives or tack for providing temporary protection or fixing of seasonal or other decorations etc.
- High pressure or steam cleaners

Hardware

Available in various finishes

Standard

Eurocylinder

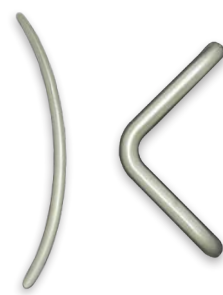

Invincible

Pull Handles

Short & Long Options
Stainless Steel Only

Bow & V Handles

Stainless Steel Only

Door Knob

Fixed handle

Invincible ERA Lock

For the ultimate protection and peace of mind, our doors are fitted with Invincible door cylinders from ERA, which have been designed and independently tested to meet the latest industry security standards.

The patented protected design completely removes the ability to break into a cylinder. With the robust 'squared' off platform significantly strengthening the mechanism against attack.

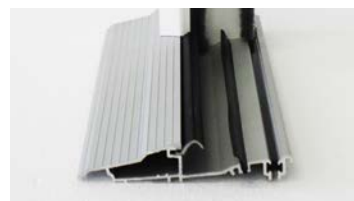

- Reinforced with five times more metal than a standard cylinder lock - it can't be snapped*
- 6 hardened high security pins for the ultimate anti-pick, anti-drill and anti-bump resistance
- Robust shape is a strong visual deterrent to would be thieves
- Independently tested to meet the latest security standards: British Standard Kitemark (TS007) and Sold Secure Diamond

Thresholds

All composite doors can be manufactured with a low threshold, with or without a cill. Available in Gold or Silver effect.
